

Polestar 2 Test Drive Event in Westport

Polestar 2 to Spend an Afternoon in Westport for Test Drives

A jazzy new entry in the luxury EV space, the Polestar 2, is being brought by Manhattan Motors to Westport on Saturday, November 7th at 12:00 PM. Test drives will be offered on a first-come-first-served basis.

Judging by the form-factor, it looks like a sport sedan. But it has a hatch and ample cargo space so that it feels like it is fitting in-between a sedan and a crossover. It is clearly targeting Tesla, along with the Jaguar iPace and the Audi eTron.

Location: TecKnow in Bedford Square, Westport

The location will be outside the TecKnow store at Bedford Square, 12 Elm Street in downtown Westport. If you come to the event, please leave the circle area for the Polestar. There is free parking across the street in the Baldwin lot.

Polestar is not exclusively an EV brand. The Polestar 1 is a sporty ICE vehicle Porsche competitor that starts at \$155,000. The vehicles are manufactured in China by Geely, which is also the parent company of Volvo. The car shares some architecture with Volvo but is a more futuristic, high-tech brand.

A Polestar 2 base trim level will set you back \$59,900, and a loaded vehicle gets to about \$72,000. According to the

manufacturer website, the EPA rated range is 233 miles delivered from a 78 kWh battery pack.

We have had one club-member do a test-drive to this point. His succinct evaluation: "Impressive."
