

EV Showcase on July 14 at Fairfield Farmers Market

EV Showcase at Fairfield Farmers Market

The [EV Club of CT](#) is pleased to showcase 6 electric vehicles at the July 14 [Fairfield Farmers Market](#) at the Sherman Green in Fairfield. Please shop the market and visit us at the showcase in the parking lot behind the market from 10 am until 2 pm to check out the cars and discuss all things EV. This event is designed to help consumers make the transition to EVs.

Gas and diesel-powered vehicles are the largest contributors to anthropogenic greenhouse gas emissions and a large proportion of urban air pollution in the US. Switching to electric vehicles makes for a quiet and clean ride with zero tailpipe emissions and a fraction of the maintenance since there are so few moving parts.

SUNDAY, JULY 14, FROM 10-2
FAIRFIELD FARMERS MARKET
SHERMAN GREEN
1451 POST ROAD, FAIRFIELD

ELECTRIC VEHICLE SHOWCASE

Tesla, Nissan, Chevy and BMW

sustainne
where sustainability prospers

The EV Club of CT will be showcasing Tesla models X, S and 3, a Chevy Volt, a Nissan Leaf and a BMWi3 to help guests learn about electric cars on the market, how easy and convenient they are to maintain, how much fun they are to drive, what smart and autonomous features each offers, and how to charge them at home and on the road.

Incentives from the state and federal government can significantly reduce the cost of a new EV (purchase/lease) and many affordable used electric cars are now on the market, including the Certified Pre-Owned BMWi3 being showcased.
