

New EV Rate Design – Final Adjudication from PURA

The Public Utilities Regulatory Authority has released the final version of the EV Rate Design

This program provides incentives for off-peak and managed charging, subsidies for EV chargers, and make-ready (bringing the electricity to where the chargers will be located). This is a dense document and we will be doing in the coming months to explain the details. Also, even though it is the final version, there are still some portions that aren't finished. Working groups have been assigned to do that and report to PURA by Oct. 15th. The plan will take effect in January 2022.
