

Speaker From FreeWire to Address Next Meeting on October 27th

Upcoming Meeting to Feature a Speaker From FreeWire

There is a virtual club meeting via Zoom scheduled for October 27th. John Erdman, Head of Strategic Accounts for [FreeWire](#), will be speaking to us about their latest charging solutions. John joined FreeWire this past August after having spent 9 years with ChargePoint.

One of the new mousetraps developed by FreeWire is a level 3 charger with a self-contained 160 kW battery that continuously draws power at the rate of 20kW per hour. This avoids the power consumption spikes typical of level 3 chargers, which are what cause facility owners to be subject to utility demand charges. We have seen first-hand in CT how that has become a major obstacle to expanding EVSE infrastructure.

We will also be providing an update on the latest information regarding proposed changes to the CHEAPR EV purchase-incentive program. Some of the proposed changes, which we have blogged about numerous times, such as [here](#) and [here](#), are controversial and, as of this writing, have still not been resolved. It is possible they will be by the 27th.

If you are interested in joining us and do not receive the club emails, please fill out the website contact form.

We look forward to virtually seeing many of you.
